Tool details

***FOR RESEARCH USE ONLY**

Name: Anti-CD81 [2s107]

Alternate name: 26 kDa cell surface protein TAPA-1, Target of the antiproliferative antibody 1, Tetraspanin-28

Class: Monoclonal

Conjugate: Unconjugated

Description: CD81 is co-opted during the life cycle of diverse human pathogens: it is involved in hepatitis C virus (HCV) and Plasmodium sporozoite invasion of hepatocytes, and also contributes to the assembly and budding of human immunodeficiency virus and influenza A virus. Developed as a part of panel of murine monoclonal antibodies against full-length CD81 to further examine and assessed their ability to inhibit or neutralize HCV infection.

Purpose:

Parental cell:

Organism:

Tissue:

Model:

Gender:

Isotype:

Reactivity: Human

Selectivity:

Host: Mouse

Immunogen: P60033, CD81_HUMAN

Immunogen UNIPROT ID: P60033, CD81_HUMAN

Sequence:

Growth properties:

Production details:

Formulation:

Recommended controls:

Bacterial resistance:

Selectable markers:

Additional notes:

Target details

Target: CD81 and its second extracellular domain (EC2)

Target alternate names:

Target background: CD81 is co-opted during the life cycle of diverse human pathogens: it is involved in hepatitis C virus (HCV) and Plasmodium sporozoite invasion of hepatocytes, and also contributes to the assembly and budding of human immunodeficiency virus and influenza A virus. Developed as a part of panel of murine monoclonal antibodies against full-length CD81 to further examine and assessed their ability to inhibit or neutralize HCV infection.

Molecular weight:

Ic50:

Applications

Application: ELISA ; FACS ; IF ; WB

Application notes:

Handling

Format: Liquid

Concentration: 0.9-1.1mg/ml

Passage number:

Growth medium:

Temperature:

Atmosphere:

Volume:

Storage medium:

Storage buffer: PBS with 0.02% azide

Storage conditions: -15° C to -25° C

Shipping conditions: Shipping at 4° C
