Tool details

***FOR RESEARCH USE ONLY**

Name: Anti-GnRH [HU11B]

Alternate name: GnRH, luteinizing hormone-releasing hormone (LHRH)

Class: Monoclonal

Conjugate: Unconjugated

Description: Gonadotropin-release hormone (GnRH), also known as luteinizing hormone-release hormone (LHRH), causes the pituitary gland in the brain to make and secrete the hormones luteinizing hormone (LH) and follicle-stimulating hormone (FSH). GnRH/LHRH play an important role in sexual development in immature animals, maintaining normal reproductive function in adults, and influences sexual behaviors in both males and females.
