Tool details

***FOR RESEARCH USE ONLY**

Name: Anti-HGF/SF [EGH2 4C12.1]

Alternate name:

Class: Monoclonal

Conjugate: Unconjugated

Description: HGF/SF is a member of the plasminogen related growth factor family, members of which are potent effectors of growth, movement and differentiation of epithelial and endothelial cells. HGF/SF may exhibit morphogenesis in adjacent cells. The membrane receptor for HGF/SF is the product of the proto-oncogene c-met, a receptor tyrosine kinase.

Purpose:

Parental cell:

Organism:

Tissue:

Model:

Gender:

Isotype: IgG2b

Reactivity: Human

Selectivity:

Host: Mouse

Immunogen: Recombinant Human HGF/SF

Immunogen UNIPROT ID:

Sequence:

Growth properties:

Production details:

Formulation:

Recommended controls: Recombinant HGF/SF

Bacterial resistance:

Selectable markers:

Additional notes:

Target details

Target: Hepatocyte Growth Factor/Scatter Factor (HGF/SF)

Target alternate names:

Target background: HGF/SF is a member of the plasminogen related growth factor family, members of which are potent effectors of growth, movement and differentiation of epithelial and endothelial cells. HGF/SF may exhibit morphogenesis in adjacent cells. The membrane receptor for HGF/SF is the product of the proto-oncogene c-met, a receptor tyrosine kinase.

Molecular weight:

Ic50:

Applications

Application: ELISA ; WB ; ELISA ; IHC ; WB

Application notes:

Handling

Format: Liquid

Concentration: 1 mg/ml

Passage number:

Growth medium:

Temperature:

Atmosphere:

Volume:

Storage medium:

Storage buffer: PBS with 0.02% azide

Storage conditions: -15° C to -25° C

Shipping conditions: Shipping at 4° C
