Tool details

***FOR RESEARCH USE ONLY**

Name: Anti-hGnRH

ols.org Alternate name: GnRH, luteinizing hormone-releasing hormone (LHRH)

Class: Polyclonal Conjugate: Unconjugated Description: Gonadotropin-release hormone (GnRH), also known as luteinizing hormone-release hormone (LHRH), causes the pituitary gland in the brain to make and secrete the hormones luteinizing hormone (LH) and follicle-stimulating hormone (FSH). GnRH/LHRH play an important role in sexual development in immature animals, maintaining normal reproductive function in adults, and influences sexual behaviors in both males and females. Purpose: Marker Parental cell: **Organism: Tissue:** Model: Gender: Isotype: Reactivity: Chicken ; Mammalian ; Salmon Selectivity: Host: Rabbit Immunogen: LHRH conjugated to bovine thyroglobulin Immunogen UNIPROT ID: Sequence: Growth properties: Production details: Formulation: **Recommended controls:**

Bacterial resistance: Selectable markers: Additional notes:

Target details

Target: gonadotropin-releasing hormone

Target alternate names:

Target background: Gonadotropin-release hormone (GnRH), also known as luteinizing hormonerelease hormone (LHRH), causes the pituitary gland in the brain to make and secrete the hormones luteinizing hormone (LH) and follicle-stimulating hormone (FSH). GnRH/LHRH play an important role in sexual development in immature animals, maintaining normal reproductive function in adults, and influences sexual behaviors in both males and females.
