Tool details

***FOR RESEARCH USE ONLY**

Name: Anti-IFITM3 [IFITM3]

Alternate name:

Class: Polyclonal

Conjugate: Unconjugated

Description: Analyses of gene expression of IFN-inducible transmembrane protein (IFITM) levels revealed high levels of expression in early and late intestinal neoplasm in both mice and humans. IFITM gene expression is rapidly induced after activation of the -catenin signalling and expression is significantly up-regulated specifically in colorectal tumors and thus may be a useful diagnostic tool in these tumors.
