Tool details

***FOR RESEARCH USE ONLY**

Name: Anti-mCherry (Rat) “Brainbow”

Alternate name:

Class: Polyclonal

Conjugate:

Description: The mCherry polyclonal antibody is one of the Brainbow collection which has been used in a multicolor labelling strategy for the fluorescent imaging of neuronal circuits and individual neurons in mice, drosophila and zebrafish and non-neuronal cells in mice. The Brainbow toolkit allows scientists to image highly complex tissue structures by relying on a stochastic method for making different expression ratio combinations of fluorescent proteins so that structures in proximity can be resolved.

Purpose:

Parental cell:

Organism:

Tissue:

Model:

Gender:

Isotype:

Reactivity:

Selectivity:

Host: Rat

Immunogen:

Immunogen UNIPROT ID:

Sequence:

Growth properties:

Production details:

Formulation:

Recommended controls:

Bacterial resistance:

Selectable markers:

Additional notes:

Target details

Target: mCherry

Target alternate names:

Target background: mCherry is a fluorescent proteins originated from coral (Discosoma sp.)

Molecular weight:

Ic50:

Applications

Application: IF ; IP ; WB

Application notes:

Handling

Format: Liquid

Concentration:

Passage number:

Growth medium:

Temperature:

Atmosphere:

Volume:

Storage medium:

Storage buffer: Serum with 0.02% sodium azide

Storage conditions:

Shipping conditions: Shipping at 4° C
