Tool details

***FOR RESEARCH USE ONLY**

Name: Anti-Pfalciparum Histidine Rich Protein 2 [299-2H 4A5]

Alternate name:

Class: Monoclonal

Conjugate: Unconjugated

Description: Hybridoma clone 299-2 HRPII 4A5 producing the monoclonal antibodies that are specific to an abundant malaria protein called histidine rich protein 2 specific to Plasmodium falciparum. The antibody can be used for diagnostic testing or immunohistochemical detection of the malaria parasite.

Purpose:

Additional notes:

Target details

Target: aldolase

Target alternate names:

Target background: Hybridoma clone 299-2 HRP11 4A5 producing the monoclonal antibodies that are specific to an abundant malaria protein called histidine rich protein 2 specific to Plasmodium falciparum. The antibody can be used for diagnostic testing or immunohistochemical detection of the malaria parasite.

Molecular weight:

Ic50:

Applications

Application: IHC

Application notes:

Handling

Format: Liquid

Concentration:

Passage number:

Growth medium:

Temperature:

Atmosphere:

Volume:

Storage medium:

Storage buffer:

Storage conditions:

Shipping conditions: Shipping at 4° C
