Tool details

***FOR RESEARCH USE ONLY**

Name: Anti-Transferrin receptor [Q1/71] rAb

Alternate name:

Class: Recombinant

Conjugate: Unconjugated

Description: The transferrin receptor is a glycoprotein composed of disulfide-linked polypeptide chains. It is ubiquitously distributed on the cell surface of actively growing human cells. Q1/71 can be used as a marker of proliferation.

Purpose:

Parental cell:

Organism:

Tissue:

Model:

Gender:

Isotype: IgG1

Reactivity: Human

Selectivity:

Host: Mouse

Immunogen: Foetal liver cells

Immunogen UNIPROT ID:

Sequence:

Growth properties:

Production details:

Formulation:

Recommended controls:

Bacterial resistance:

Selectable markers:

Additional notes:

Target details

Target: Transferrin receptor (CD71)

Target alternate names:

Target background: The transferrin receptor is a glycoprotein composed of disulfide-linked polypeptide chains. It is ubiquitously distributed on the cell surface of actively growing human cells. Q1/71 can be used as a marker of proliferation.

Molecular weight:

Ic50:

Applications

Application:

Application notes:

Handling

Format: Liquid

Concentration:

Passage number:

Growth medium:

Temperature:

Atmosphere:

Volume:

Storage medium:

Storage buffer:

Storage conditions:

Shipping conditions: Shipping at 4° C
