Tool details

***FOR RESEARCH USE ONLY**

Name: PC6 (Clone 8F5)

Alternate name: PC6

Class: Monoclonal

Conjugate: Unconjugated

Description: Potential uterine fluid biomarker for endometrium receptivity. Determining endometrial receptivity is vital in in vitro fertilization (IVF) treatment because the timing of embryo transfer needs to be synchronized with endometrial receptivity. We have previously demonstrated that proprotein convertase 5/6A (PC6) is highly expressed in the receptive endometrium and that PC6 is critical for receptivity establishment in women. Endometrial PC6 is secreted into the uterine fluid, and levels correla...

Purpose:

Parental cell:

Organism:

Tissue:

Model:

Gender:

Isotype:

Reactivity: Human

Selectivity:

Host: Mouse

Immunogen: Synthetic peptides of human PC6 (PSGYLLDLGMC 857-867 aa; CPPGHYHADK 674-684 aa; NSAVRSIYKASGC 482-494 aa conjugated to keyhole limpet hemocyanin though a C-terminal Cys

Immunogen UNIPROT ID:

Sequence:

Growth properties:

Production details:
Formulation:
Recommended controls:
Bacterial resistance:
Selectable markers:
Additional notes:

Target details

Target: Proprotein convertase 5/6A (PC6)

Target alternate names:

Target background: Potential uterine fluid biomarker for endometrium receptivity. Determining endometrial receptivity is vital in in vitro fertilization (IVF) treatment because the timing of embryo transfer needs to be synchronized with endometrial receptivity. We have previously demonstrated that proprotein convertase 5/6A (PC6) is highly expressed in the receptive endometrium and that PC6 is critical for receptivity establishment in women. Endometrial PC6 is secreted into the uterine fluid, and levels correla...

Molecular weight: 90

Applications

Application: IHC ; WB
Application notes:

Handling

Format: Liquid
Concentration:
Passage number:
Growth medium:
Temperature:
Atmosphere:
Volume:
Storage medium:
Storage buffer:
Storage conditions:
Shipping conditions: Shipping at 4° C
