Tool details

***FOR RESEARCH USE ONLY**

Name: B16-F10.9 melanoma cells

Alternate name: B16-F10.9, F10.9

CancerTools.org

Class:

Conjugate:

Description: A model to study melanoma metastasis in mice

Purpose:

Parental cell: B16F 10

Organism: Mouse

Tissue: Skin

Model: Tumour line

Gender:

Isotype:

Reactivity:

Selectivity:

Host:

Immunogen:

Immunogen UNIPROT ID:

Sequence:

Growth properties: adherent cells

Production details: Single cell cloning and in vivo testing

Formulation:

Recommended controls:

Bacterial resistance:

Selectable markers:

Additional notes:

Target details

Target: melanoma

Target alternate names:

Target background:

Molecular weight:

Ic50:

Applications

Application:

Application notes:

Handling

Format:

Concentration:

Passage number:

Growth medium: Dulbecco's modified Eagle's medium (DMEM), supplemented with 10% fetal calf serum (FCS) , 4 mM glutamine and 0.4% combined antibiotics

Temperature:

Atmosphere:

Volume:

Storage medium:

Storage buffer:

Storage conditions:

Shipping conditions:
