Tool details

***FOR RESEARCH USE ONLY**

Name: anti- HIV-1 protease iBody small molecule (tool compound)

Alternate name: HIV-1 PR; HIV-1 protease; HIV-2 protease; HIV1 PR; HIV2 PR; HIV1 protease

Class:

Conjugate:

Description: HIV-1 protease is a retroviral aspartyl protease (retropepsin), an enzyme involved with peptide bond hydrolysis in retroviruses, that is essential for the life-cycle of HIV, the retrovirus that causes AIDS. - iBodies™ are capable of replacing antibodies in biomedical applications such as ELISA, flow cytometry, confocal microscopy, immunocytochemistry, Western Blot and immunoprecipitation. - These iBodies™ consist of an N-(2-hydroxypropyl)methacrylamide (HPMA) copolymer decorated with low-...
