Tool details

***FOR RESEARCH USE ONLY**

Name: Isobenzofuran analog of sclerophytin A (6h) small molecule

Alternate name:

Class:

Conjugate:

Description: Naturally occurring products 2, 11 cyclized cembranoids have been shown to inhibit the growth of KB3 nasopharyngeal carcinoma. The standard cancer cell line used to test for chemotherapy effectiveness. The bicyclic hydroisobenzofuran is the beneficial compounds that are naturally occurring in 2, 11 cyclized cembranoids. This compound has shown inhibition of growth of KB3 cancer test cells and could be used in cancer and antibiotics research.

Purpose:

Parental cell:

Organism:

Tissue:

Model:

Gender:

Isotype:

Reactivity:

Selectivity:

Host:

Immunogen:

Immunogen UNIPROT ID:
